

SUSTAINABILITY AT ZÁTIŠÍ

Our CO₂ footprint for 2023 is 23,231.4 tons. By 2025, we aim to reduce our carbon footprint by 10%.

What steps are we taking to achieve this?

5 % of the total direct emissions released into the air

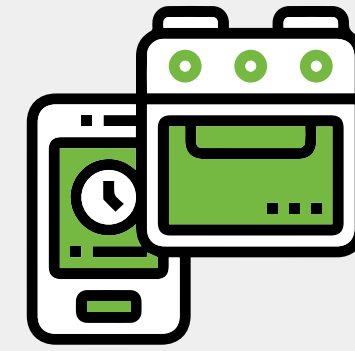

SCOPE 1

- Supporting local suppliers and farmers
- Implementing the farm-to-fork and back principle
- Creating menus from seasonal and organic produce
- Producing homemade supplementary products

These steps reduce transportation emissions.

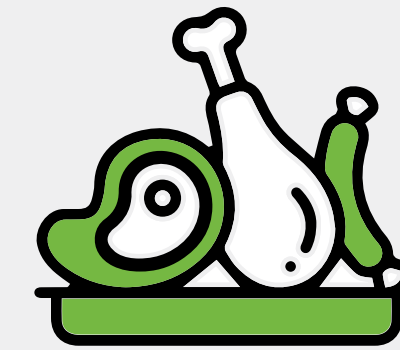

10 % of the total emissions from consumed energy

SCOPE 2

- Implementing energy-saving practices
 - **Replacing inefficient equipment**
 - Switching to renewable energy sources in our preparation areas
- 10% emissions from consumed energy

85 % of the total emissions from production, waste, and employee commuting

SCOPE 3

- **57.4% of our total emissions production comes from meat.**
- Reducing meat portions and seeking **protein alternatives**
- Promoting vegetarian and vegan menus
- Adopting a zero-waste approach in our menu
- **Actively collaborating with the organization Zachraň jídlo, where in 2023 we donated 9031 meals to Zachraň oběd**
- We have an effective plan for reducing and reusing bio-waste
- **Educating 2500 children about sustainable and balanced diets in collaboration with nutrition therapists Ne hladu**

We aim for 100% transparency and digitization of sustainability data

We are on the path to B-Corp certification

Zátiší Group.
